

PUBLIC ONLINE AUCTION

Surplus to the ongoing operations of:

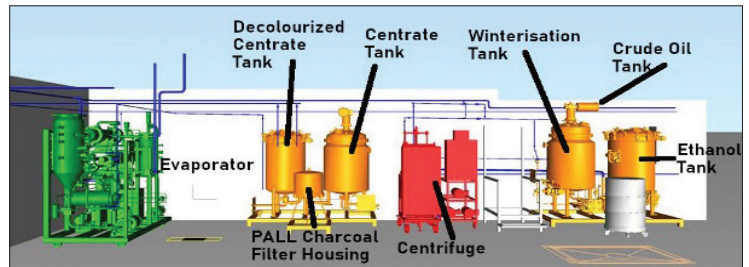

Winterization Skid and CO2 Extractor

Winterization Skid System (by Stainless Piping Systems) Original Cost Over \$1,200,000 (2020)

- The winterization skid was designed to heat 240L of an ethanol/cannabis resin solution from 20C to 60 C in 90 minutes, followed by cooling of this solution to -40C in 120 minutes in the Winterization Tank. Approx capacity of 40 kg per 8 hour shift.
- Skid used only minimally for testing purposes only. Remaining items are still in original crates in storage.

Super & SubCritical CO2 Extractor (by Pure Extraction) 5 Litre Extraction System, with Chiller

Original Cost Over \$150,000 (2018)

Oil extractor has 3 main systems that operate together to ensure closed loop subcritical and supercritical extraction of botanical oil

- Liquid CO2 pump to pressurize and create flow of CO2
- Back pressure regulator, to adjust pressure of pump outlet
- Pre heater with controls to increase pressurized CO2 to extraction temp

Only used minimally for testing purposes, less than approx. 100 hours. Note: Owned by third party (not Aleafia)
